- 28 SQM - KSH 2300
- 44 SQM - KSH 3600
- 75 SQM - KSH 6000
- 95 SQM - KSH7600

19. There are talks that there is a water shortage around Machakos, how has the developer addressed this issue?

The project's water system will be connected to the Mavoko Water and Sewerage company water distribution line. There's also county dam projects underway which will aid in complementing the existing water distribution line. We are also accessing other forms of water technologies that will ensure that drinking and non-potable water will be sufficient for the estate. Our bio ponds are also natural rain collection systems that will cater for the estate's non-potable water usage (car washing, watering of landscapes and cleaning of common areas, etc.) in order for us to not waste good treated water. We are also considering having boreholes in the estate.
